## Contents

4

### Pleated Retractable

Our most popular retractable fly screen. A cost effective screen which is durable & attractive.

5

### Smooth Retractable

A flat see-through fly screen popular for use in window screens.

6

### Barrier Free Pleated Retractable

The same mesh as our standard pleated retractable with a low bottom track allowing for a smoother transition for prams and wheelchairs.

7

### Barrier Free Smooth Retractable

The same mesh as our standard smooth retractable but with no bottom track allowing for smooth transition for prams & wheelchairs.

## SP Screens retractable fly screens are a popular choice for Australian homes for many good reasons.

Custom made & professionally installed for a perfect fit. SP Screens retractable flyscreens are a practical and stylish way to keep insects out of your home.

So many good reasons to choose retractable fly screens for your home:

- A modern and minimalist way to keep insects out
- They slide out when in use and slide away discretely when not in use
- They create a seamless transition from indoor to outdoor areas
- They are suitable for screening almost all types of doors and windows
- When not in use they blend with your door or window frames
- Suitable to screen any size door or window opening
- They can slide up and down, or slide across

Reasons retractable fly screens may NOT be right for your home:

- The screen area may be exposed to a lot of high wind which may blow the screen out of its track often
- You have pets that would be attracted to tearing the fly screen mesh in a retractable screen
- You have young children who would likely run through the retractable screen and tear the screens tension cords

Retractable Fly Screens are the perfect way to keep insects out of Australian homes as they can be installed on all different types of door and window openings. Even traditionally difficult to screen styles are suitable for retractable screens, such as:

- **Doors:** Stacker Doors, Bi-Fold Door, French Door, Corner Door.
- **Windows:** Servery Window, Bi-fold Window, Casement Window, Awning Window.
- **Outdoors:** Patio, Alfresco, Garage Doors.

# Standard Pleated Retractable Fly Screen

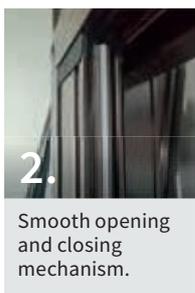

## Product Features

Our pleated fly screens use a superior design system combined with an extra strong and durable mesh, engineered to last and keep insects out of your home.

Pleated fly screens work in the same way as a concertina: by using the folds to neatly stack the mesh back into itself. When the screen is extended, a series of tensioning cords keep the mesh in position. A standard pleated insect screen can span up to an impressive 9.5 metres with a double screen, and 5 metres for a single screen.

**1.** Magnetic click for secure close.

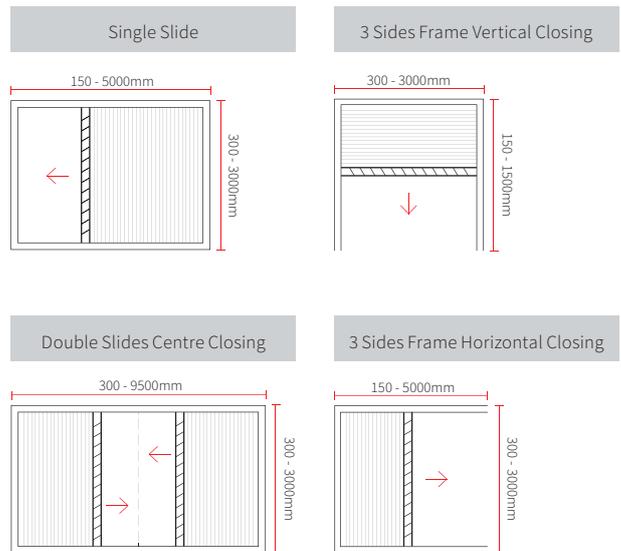

**2.** Smooth opening and closing mechanism.

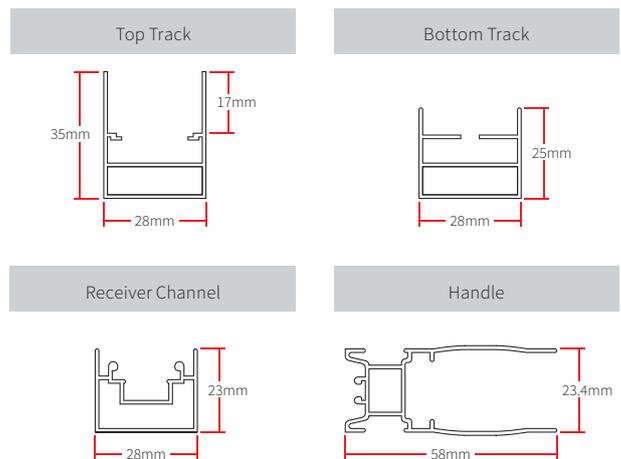

**3.** Wind hooks to help keep mesh in place.

## OPENING CONFIGURATION

## TECHNICAL SPECIFICATION

## PRODUCT DETAILS

### Frame colour options

*\*Custom colour available*

**Note:** These colours are for reference only and are an approximate of the true colours.

### Mesh colour options

Grey / Black

### Mesh Material

(PE + PP), Midge proof (3 years warranty)

### Frame Material

Powder coated aluminium (5 years warranty)

# Smooth Retractable Fly Screen

## Product Features

Perfect for screening windows, a smooth fly screen system that allows you to roll out the screen when you need it, and roll it away when you don't. It will gently retract into the cassette which blends seamlessly with your window frame.

The soft close system enables the screen to be fixed part way along the screen opening so it can be left partially open.

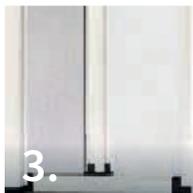

1.

Anti-lift design to keep fly screen in place.

2.

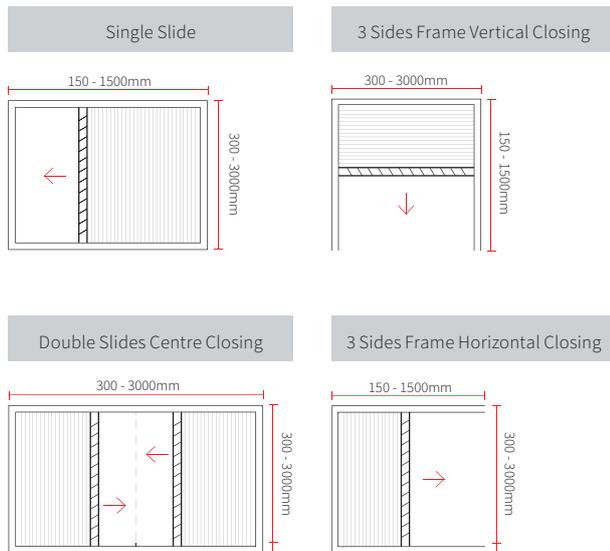

Magnetic click for secure close.

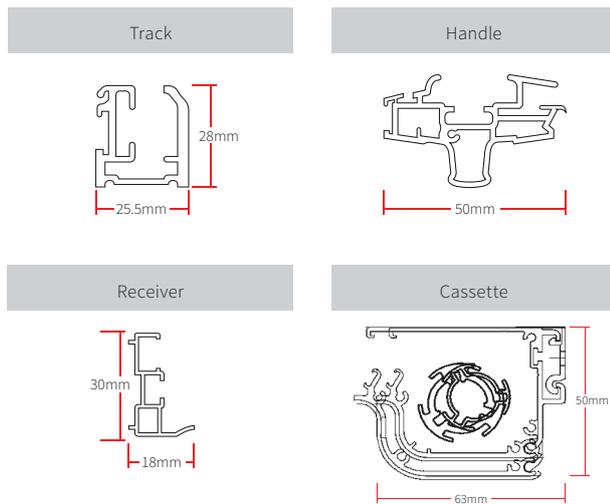

3.

Stop screen at any place.
