# Security Screens

**WHAT'S IN AN SP SCREEN?**

- Exceeds Australian Security Standards

---

- Custom made

---

- Strong and attractive frame

---

- Choice of screen types

---

- Large colour range

---

- Corrosion resistant

---

- Professional licenced installation

---

Custom Made

Quality security screen doors and windows to suit a variety of homes, security needs and budgets.

Professional Installation

***Our custom built security screens are always on guard***

- Security against intruders
- Keeping children safe from window falls
- Safe emergency exit from house fires
- Protection during cyclones and bushfires

Quality Guaranteed

***Your safety is our priority***

At SP Screens, we are committed to installing high quality security screens for doors and windows that stop intruders in their tracks.

Competitive Prices\*

Australian Made

Our security screens are designed for superior strength and safety, and exceed independent testing, ensuring we can protect Australian homes and give families peace of mind.

***We've got you covered with a wide range of options***

Our security screens are available in:

- Hinged, sliding & stacking security doors
- Fixed, hinged & sliding window security screens
- Fallsafe Screens
- Fire & Emergency Escape Screens
- Cyclone screens
- Bushfire screens
- Pet doors
- Shop fronts
- Outdoor room extensions

With a sleek design, they blend effortlessly into any façade, ensuring they look great in any home.

***Guaranteed to last***

All our security screens are custom made in Australia to precise door or window measurements and professionally installed by our local team of licenced installers. These quality products are backed by industry leading warranties.

# Security Screen Doors

Our security screen doors offer peace of mind day and night.

Security screen doors are versatile and functional allowing you to vet visitors before you let them in, and secure your doorway while you leave your door open for ventilation.

Our range of hinged and sliding security doors provide safety, security, and peace of mind and are custom made to fit any door style and size.

Designed to complement the aesthetics of each doorway, our security screens let you incorporate an exceptional level of security into modern designs providing you with safety and style.

Our security screen doors are manufactured using a patented tensioning tool which enables our screens to be custom built for most large openings without mid rails.

## FEATURES

Complies with Australian Security Standards

Custom built in Australia to precise measurements

Suitable for out of square doorways

Highly tensioned mesh

No mid rails obstructing your view

Hinged door

French door

Sliding door

Stacking door (double and triple)

# Window Security Screens

Window safety and security from the inside out.

Our durable security screens allow you to get the most out of passive cooling, by making it safe to open every window to its full extent – and keep it open – without interrupting your view.

We can protect windows of all sizes with either SecureView Eclix, Xceed or SaltWaterSeries Security Screens.

Our security screen windows are manufactured using a patented tensioning tool which enables our screens to be custom built for large openings with reduced flex.

## FEATURES

- Complies with Australian Security Standards
- Custom built in Australia to precise measurements
- Suitable for out of square windows
- Meets Building Code

Our security screens have been independently tested to comply with Australian Security Standards.

Our fixed, hinged and sliding security screens suit a range of window styles including:

Sliding (single & double)

Single and double hung

Awning

Casement

### Fire & Emergency Escape Screens

- Quick and keyless opening from the inside
- Exceptional external security
- Complies with Australian Security Standards (AS 5039)
- Optional outward swinging, inward swinging, and sliding

It is important to determine an emergency escape plan, particularly when you are screening your entire home. Fire & Emergency Escape Screens feature a keyless, quick release latch, for easy opening in case of an emergency, without compromising on external security.

These exceptionally strong screens were innovatively designed with safety and practicality in mind.

Fire & Emergency Escape Screens are available in outward swinging, inward swinging, and sliding options.

## Kids Fallsafe Screens

- No need for a window lock restricting the opening to 12.5cm
- Meets Building Code legislation

Kids Fallsafe Screens are a great choice for bedrooms and high traffic areas where you would like to fully open your window while kids play.

The Building Code of Australia (BCA) set legislation that windows 2 metres above the ground floor cannot open more than 12.5cm unless the opening is protected to withhold 25kg of pressure in three different points. Fly Screens do not comply with this code.

Mesh infill options:

- BasiX safety screen
- Xceed security screen
- SecureView security screen
- SaltWaterSeries security screen

When installed by our licensed installers, our range of Kids Fallsafe Screens comply with the BCA code, and we can conduct testing to certify your Kids Fallsafe screen.

Xceed, SecureView and SaltWaterSeries are all independently tested to exceed Australian Standards 5039 and are classified as a security screens as well as a Fallsafe Screen.

#### DID YOU KNOW...?

Most window accidents happen in the family home due to kids playing, climbing, or jumping near open windows and leaning on fly screens.

## Choose the right security screen mesh for you

Our range of security screens are manufactured using a patented fixing system with your choice of security screen mesh. We have three security screen systems including our top of the range SecureView Eclipx and coastal SaltWaterSeries woven stainless steel security screens, and our economical Xceed perforated aluminium screens.

All offer a wide range of features to meet Australian Standards AS5039-2008, while SecureView Eclipx and SaltWaterSeries meet additional testing to ensure it continues to protect homes in cyclone, fire and corrosion prone areas.

Xceed security screens are made from an extremely durable perforated aluminium sheet and extruded aluminium frame using a patented fixing method. Perforated aluminium screens are a modern and more secure replacement to dated Diamond Grilles and a less expensive alternative to the premium woven stainless steel mesh.

Xceed is a great cost effective alternative to woven mesh security screens. They offer a wide range of features to meet Australian Standards, has the corrosion resistant properties of aluminium, and act as a sun shade to reduce heat.

Due to its structural grade alloy, the Xceed perforated aluminium is thinner and stronger than the commonly used architectural grade aluminium.

### Features

- Surpasses Australian Standards
- Corrosion resistant properties of aluminium
- Added privacy

Most Popular

SecureView Eclix security mesh is made from .8mm 316 marine grade stainless steel, expertly woven in state-of-the-art facilities, and extruded aluminium frame using a patented fixing method.

Superior to its 304 steel counterpart, SecureView Eclix is selected for its superb strength, durability and resistance to corrosion, embers and flying debris.

SecureView Eclix gives you ultimate security, clear unobstructed views, without compromising on the aesthetics of your building.

**Features**

- Surpasses Australian Standards
- Corrosion resistant – 316 marine grade woven mesh
- Cyclone rated
- Bush fire rated
- Highly tensioned mesh
- Unobstructed views

Specialty

SaltWaterSeries security doors and windows are made from 316 marine grade stainless steel woven mesh, specifically powder coated for harsh conditions. The mesh is chosen for its superb strength, durability and corrosion resistance, and is far superior to the 304 steel mesh on the market.

SaltWaterSeries is designed for optimum performance and durability in extreme environments including:

- Coastal areas within 500m from the coastline or up to 2 km for properties located on an escarpment, where prevailing wind will carry salt air
- Iron rich red dust prone areas and heavy industrial areas
- Surpasses Australian Standards
- Protective powder coating for optimal corrosion resistance
- 316 marine grade woven mesh

Mesh samples can be supplied during your free consultation or by visiting your local showroom.

# Designed for strength and durability with a sleek finish

## Testing: How strong is it?

The Australian Standards (AS5039 – 2008) stipulate a range of scientific tests that a security product must pass in order to remain in this class. These tests ensure the intrinsic strength and structural integrity of our manufactured security doors and windows are maintained. SecureView, SaltWaterSeries and Xceed are independently tested and surpass these standards.

### Australian Standards (AS5039 – 2008)

- Knife Shear Test
- Pull Test
- Anti-Jemmy Test
- Impact Test
- Probe Test\*
- Shear test\*

\*NA due to the hole aperture being far less than the test requirement

## SecureView Eclix and SaltWaterSeries Security Screens surpass additional testing to achieve:

### Aluminium Frame Tests

(AS/NZS1866:1997 & AS3715 – 2002) 60603 T5 powder-coated to a minimum thickness of 60um

### Neutral Salt Spray Test

AAMA2605-05 Section 7.8.2

### Bush Fire Protection

AS3959-2009 satisfying the requirements for bushfire attack level (BAL) 12.5,19,29,40.

### Fire Attenuation Test

Australian Standard AS1530.4-2005, Appendix B7 achieving 45.6% reduction in radiant heat flux between the inside and outside of the product.

### Cyclonic Screen Test

Australian Standard 2010: AS1170.2-2011 resisting a 4kg, 100mm x 50mm timber projectile travelling at 30 metres per second (108 kph) surpassing the standard test of 15 metres per second.

Further information on each of these Australian Standards tests are available through our supplier at [www.commandex.com.au](http://www.commandex.com.au).

## Design: How is it put together?

### Patented fixing system

Our SecureView Eclix, SaltWaterSeries and Xceed Security Screens use a unique Australian Patented fixing method that maintains unsurpassed strength and durability.

#### 1 – Innovative keyway fixing system

The unique two-part wedge system has been designed to create the precise pressure required to activate the VHB™ adhesive to its full potential. This VHB™ chemical bonding is proven to have the strength to replace rivets. Both wedges are made from UV stabilised PVC to yield superior durability over time.

Unlike screw-clamp or riveted systems, all our screens use innovative technology that provides clear spacing between the security screen infill and aluminium frame. This eliminates the opportunity for galvanic corrosion, which occurs when dissimilar metals contact.

#### 2 – 3M™ VHB™ acrylic bonding

All our security screens are free from mechanical fixings such as screws and rivets. Instead they employ VHB high performance chemical bonding technology to create effortless strength.

The acrylic chemistry of the VHB adhesive delivers exceptional durability while its viscoelasticity provides superior energy absorbing properties which helps to eliminate stress points.

#### 3 – Sleek aluminium frame

Our extruded aluminium frame system is crafted to deliver a lightweight solution without compromising on strength. The frame features gold accredited Interpon™ powder coating that delivers a durable finish in a versatile range of colours including the latest Colorbond™ colours.

Solid aluminium stakes are used to fortify each corner joint to provide steadfast strength.

#### Three-point locking system

Our range of security screen doors are installed with an integrated three-point locking system to comply with Australian Security Standards.

# Safety Screens

Custom Made

Professional Installation

Quality Guaranteed

Competitive Prices

Australian Made

Safety Screens are a great entry point for reliable home safety.

At SP Screens we supply and install custom made safety screens in a range of designs and colours.

## BasiX woven stainless steel

BasiX safety screens offer an attractive entry point into the woven stainless mesh range with its .7mm 316 marine grade stainless steel mesh infill.

The mesh has a similar look and feel as our security screen woven mesh, however it is thinner and not tested to meet Australian Standards 5039.

The BasiX mesh features a hole aperture of 1.406mm to guard homes against the tiniest of creatures, including most sand flies.

- Single and double hinged doors
- Single, double and stacking sliding doors
- Fixed windows screens
- Kids fallsafe screens – subject to individual testing

## Diamond Grilles

Diamond Grille safety screens strength comes from a 7mm aluminium grille pressed into an aluminium frame and then finished with a flyscreen insert.

For added strength, the grille is riveted at regular spacing around the entire frame. The end result is a safety door that not only keeps bugs out, but deters unwanted intruders too, especially when fitted with a triple lock.

Our Diamond Grille safety screens come in a variety of mesh finishes.

- Single and double hinged doors
- Single, double and stacking sliding doors
- Fixed windows screens

Safety Screens are much stronger than flyscreens and act as a security deterrent.

### Diamond Grilles

Features		
Mesh infill	A thinner 316 woven stainless steel safety mesh with a smaller hole aperture designed to keep out the smallest insects.	7mm aluminium grille with flyscreen mesh.

Australian Made

### *Pleated Retractable Screen*

Pleated screens can be fitted to slide across for doorways or slide up for serveries.

A pleated screen works in the same way as a concertina, by using the folds to neatly stack the mesh back into itself. When the screen is extended, a series of tensioning cords keep the mesh in position.

Pleated Insect Screens can span up to an impressive 10 metres with a double screen. For wider areas, the barrier-free pleated system can span infinitely using multiple panels.

### *Smooth Retractable Screen*

A system that allows you to roll the screen out when you need it, and roll it away when you don't. It will gently retract into the cassette which blends seamlessly with your windows and/or door frames.

Retractable insect screens are available in two options: a standard soft close system or the multi-lock soft close system which enables the screen to left partially open.

Our durable and stylish Retractable and Insect Screens are custom made and professionally installed to ensure the perfect fit.

## *Fly Screens*

Keep your home insect free with SP Screens' range of fly screens. We have a range of frame colours available with a choice of three types of insect mesh:

- Bushfire Approved Mesh – A stronger option mesh for any job
- Pet Proof Mesh – Scratch-resistant and tougher than standard fibreglass
- Fibreglass Mesh – The standard for most fly screens

Insect screens for window and doors are manufactured to suit a range of styles including:

- Single & double hinged doors
- Single & double sliding doors
- Multi stacking sliding doors
- Window screens

# Aluminium Slat Fencing

Custom Made

Professional Installation

Quality Guaranteed

Competitive Prices

Australian Made

Add privacy to your home and yard with our customisable slat fencing.

A sleek customisable aluminium slat system that can be installed as a privacy screen, fence or gate in your yard to provide privacy for your home by screening your family from the street or the neighbours.

Our professional installations offer a compelling alternative to wasting your weekends on DIY projects. Forget visiting the hardware store for flimsy, ill-fitting, inferior aluminium slatted screens that take days to install.

Our professional team can help you choose the fence, privacy screen or gate that's perfect for your home and ensure a solid, beautiful result without you lifting a finger. Offering the flexibility to choose almost any colour and size at whatever slat spacing you choose with a sleek design which cleverly hides all ugly screws from sight.

*Aluminium slatted screens can be used to provide privacy and cover for a range of scenarios around the home:*

- **Brick pier infills**  
Ideal for pier infills adding modern style and privacy.
- **Fencing and gates**  
To keep your home and/or pool area safe and secure.
- **Deck and/or balcony areas**  
So you can relax and enjoy complete privacy when you're outside.
- **Utility screens**  
Including pool filter boxes, bins, air conditioning units and/or gas bottles.
- **Screening in carports and patio enclosures**  
Providing extra screening and privacy.
- **Window screens**  
Giving you privacy from neighbouring houses and the sun

### *Low maintenance and built to last:*

- Professional installation
- Engineered and constructed to stand the test of time.
- Reinforced screwed fixings – Keeping your screen super secure, long-lasting and withstanding of the elements.
- 11-year warranty
- Superior Quality Accessories – We only use the highest quality hinges, latches and locks from reputable suppliers on all our privacy screens and gates.

### *Customise your privacy screen*

The slatted aluminium panels are fully customisable, so you can specify the privacy screen height, width, and slat spacing.

### *Technical specifications*

---

*Slats:* 65mm x 16mm

---

*Privacy screen posts:* 44mm x 44mm

---

*Gate frame & posts:* 50mm x 50mm

---

*Slat spacing:* fully customisable

---

Mounting location and panel size will determine if a mid rail or centre post is required.
